Transparency in Examination

College Internal examination scheme in relation to PDSU Examination Pattern

College believes in conducting internal examinations i.e. a) Internal assessment b) Pre - university examination. The performance of the students is reported to the parents also. Evaluation process is very transparent as the students can apply for revaluation and check his/her answer sheets of internal assessment. It is entirely an internal process and the marks are not added in the final University examination. For Pre University exams he/she has to apply in university examination cell. Final examination schedule notification is given through college website, from college notice board or mobile text messages. The student can also get it from the website of PDUSU.

Our college maintains complete transparency in conduction of internal exams. We know that fair exams measure students' merit. The college exams are conducted in a secure environment with strict invigilation. Certain measures are taken into consideration:

- (1) Keeping the secrecy of question paper.
- (2) No authority is allowed to take any type of electronic gadget inside Examination Cell.
- (3) Students are also deprived of retaining any electronic equipment inside the examination hall.
- (4) The college senior teachers set the question bank; thereafter Examination head compiles a relevant question paper for internal examination.
- (5) The final college question paper should always be kept under tight security in the control room.
- (6) The sealed question paper is taken out in front of the college principal one hour before the conduction of the examination and straight away distributed to the students.

Question Paper is drafted as per the PDUSU pattern, to make the students familiar with the University examination pattern. After the conduction of Internal Examination, result is compiled and within the span of 10 days; Parent-Teacher Meet is organized in which the

students' performance in academics, co-curricular activities, regularity and attending the classes, behavioral approach with his peers is discussed. This helps in building a cordial relationship among the trio. This gives a motivational upliftment to the students.

As it is stated above that if the student is not satisfied with the marks obtained can directly apply in the examination cell with an application which is free of cost and if in case a discrepancy is found then a fresh report card is made and handed over to the student with rectification.

The college will soon facilitate the examination cell with computer based application which shall keep details of the students' i.e. their course, marks, rank, category and origin etc. till the student doesn't pass out from the college. After passing a consolidated final report can be stored year wise.

The college will be able to provide details of the students as whenever after years also the student demands for his/her credentials. This process will not only build faith of the student in the college but also work as a mouth publicity factor promoting the good will of the college and diverting more admissions and this will surely give rise to the financial department promoting better infrastructure.

- Q 1. एक छल्ला, जो कि एक पतली लम्बी चिकनी छड़ पर फिसल सकता है, छड़ के एक सिरे 0 से d दूरी पर स्थित है। छड़ को एक समान रूप, बिन्दू 0 के सापेक्ष एक क्षैतिज तल में घुमाया जाता है। सिद्ध कीजिए कि छल्ला वक्र $r = dcosh\theta$ में घूमता है।

A ring, which can slide on a thin smooth rod, rests at a distance from one end 0 of the rod. The rod is then set revolving uniformly about 0 in a horizontal plane. Show that the ring describes the curve $r = dcosh\theta$.

- Q 2. एक कण एक वक्र में इस प्रकार चलता है कि इसके स्पर्श रेखीय तथा अभिलाम्बिक त्वरण सदा समान रहते हैं और इसकी स्पर्श रेखा का कोणीय वेग अचर रहता है। पथ ज्ञात कीजिए।

A Particle moves in a curve so that its tangential and normal accelerations are equal and the angular velocities of the tangent are constant. Find the Path.

- Q 3. एक भारहीन प्रत्यास्थ डोरी जिसकी लम्बाई l है, एक सिरे से लटकाई जाती है तथा दूसरे सिरे से दो विभिन्न कण जिनकी संहति m_1 तथा m_2 है, बांधे गये हैं, यदि इनके संगति आवर्तकाल t_1 तथा t_2 हो तथा c_1, c_2 इनके लिए स्थैतिक विस्तार हो, सिद्ध करो कि $g(t_1^2 - t_2^2) = 4\pi^2(c_1 - c_2)$

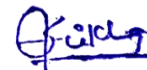

A light elastic string of natural length is l is hung by one end and to the other end tied successively Particles of masses m_1 and m_2 . If t_1 and t_2 be the Periods c_1 and c_2 the statical extensions corresponding to these two weights Prove that $g(t_1^2 - t_2^2) = 4\pi^2(c_1 - c_2)$
